

ALPI PACKAGING DISPOSAL

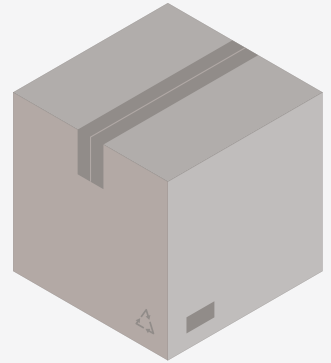

Packaging /

Decree number 360 issued on 29.9.2022 by the Italian Ministry of the Environment and Energy Security officially adopts the "Guidelines on the labelling of packaging" found in article 219, clause 5, of legislative decree number 152 issued by the Italian government on 3.4.2006.

Guidelines include the following:

- Producers must indicate on all packaging (primary, secondary and tertiary) the material's alphanumeric code according to the list provided in Decision 97/129/EC.
- All packaging must be labelled. This can be done in the form and manner that the company considers most suitable and effective. Digital tools such as apps, QR codes and websites may be used to fulfil the obligation of environmental labelling of packaging. Digital information may substitute or supplement the information indicated directly on the packaging.
