Wall and Ceiling

WORDS _Evan Pavka

Wood

1 Wavy Fir

For its recent collaboration with Alpi, British studio Raw Edges crafted two FSC-certified poplar veneers — Wavy Fir Blue and Wavy Fir White — defined by an undulating grain pattern. The 250-by-65-centimetre sheets can be used on a range of vertical and horizontal surfaces. alpi.it

2 Louver

Suited for both wall and ceiling applications, Plyboo's fire-rated bamboo panels come in 1.2-by-2.4- and 1.2-by-3-metre modules in three designs (Butterfly, Beeswing and Sail), each with various options. Seven standard shades are offered, as well as customizable colours and acoustic formats. plyboo.com

3 Modulor

Inspired by the work of iconic modernist architect Le Corbusier, the lacquered solid wood boiserie Modulor by Atelier Casabella is conceived for a host of bespoke installations. The made-to-measure product can be specified in any RAL or NCS shade or matched to designers' samples. ateliercasabella.com

4 Cambio

This adaptable wall system features magnetic panels that allow for unique compositions of metal, felt, pin board, solid colour and wood (white oak, Caribbean walnut and reclaimed Douglas fir). The last are available in three sizes: 45.7 by 45.7, 45.7 by 91 and 45.7 by 137 centimetres. windfall.design

5 Block

In two profiles (7.6 or 14 centimetres) and lengths that stretch from 30.5 to 302 centimetres, Turf's Block is a versatile acoustic baffle system with 30 felt and eight wood-look finishes. It also boasts an NRC rating between 1.9 and 2.25, depending on the spacing of each element. turf.design
